

ROBeeZ

1. For Best results, print this size chart on letter-sized paper (8.5" X 11"). Print as "Actual Size", do not select "Print to scale" in your printer options.
2. Be sure to measure both feet & use the measurement from the larger foot.
3. When in doubt, wiggle room is best. Growing feet & toes need room to properly develop. If your child is between sizes, choose the larger size.
4. Please note: Certain older styles have different sizing. It is best to use the sizing chart on the actual product page to determine the best size for your child.
